

Our **technology expertise** Your **business success**

We Design, Build & Support

About us

Headquartered in London, WM Promus boast 15 years expertise in digital transformation consultancy and solutions using the best DevOps, ITOM, RPA and AI technologies. WM Promus drive business success through innovation and automation.

Our impressive client portfolio includes national, multinational and other large corporations from financial, defence, legal, higher education and retail sectors - amongst many others. We also act as a trusted partner to smaller businesses who are looking for support on their digital transformation journey.

We are here to help reshape IT services, to increase return on investment, predict and prevent service issues and better align IT to the business. Our range of expertise and experience at all levels and across all IT divisions – strategy, technology, process, operations, governance – is what makes us the ideal partner.

Through technology, we bring success to clients

We act as a trusted partner to assist our clients. We understand that client problems are not siloed. Our depth and breath of expertise and know-how is what makes the difference. Over 80% of our employees are technology consultants and business-solution specialists who are dedicated to helping our clients develop and evolve their businesses through technology.

Whenever you need **IT strategy guidance**, **advice on tooling/processes** or assistance with **automating your technology/business processes** - WM Promus have you covered.

Client testimonials

A UK leading aerospace manufacturer

"The relationship with WM Promus has grown and developed through multiple phases of work, each one building on the successes of the previous one. Over the years, WM Promus have worked closely and collaboratively with us, on projects as diverse as a data centre migration, application upgrades, licensing and installation of new solutions, IT strategy planning and more. They have never failed to deliver as promised and (in my eyes) will go over and above to ensure a timely and effective solution."

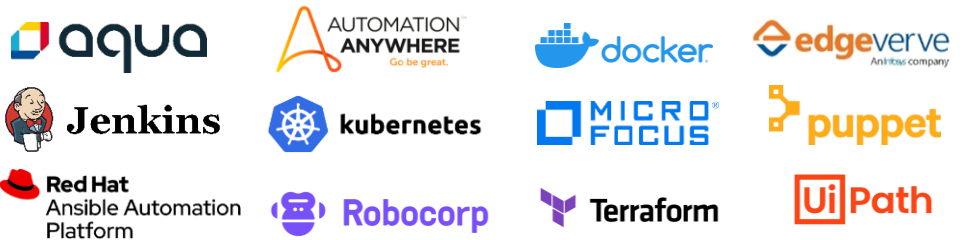

- Service Operations Manager

A European multinational financial services company

"WM Promus feel as if they are part of our IT team. They have provided support services to us for more than a decade. We also regularly engage them to provide consultancy around Asset Management. Communication between us is constant and uncomplicated. We know that we can rely on them."

- IT Procurement Manager

Implementation and service partners of:

Amazon Web Service • Microsoft Azure • Google Cloud Platform
